## Botanical Garden Celebrates Darwin's Birthday with Wild Life of our Bodies Presentation

Chapel Hill – On **Thursday, February 12, 7:30-9 pm**, the North Carolina Botanical Garden (NCBG) will celebrate the 206<sup>th</sup> birthday of Charles Darwin with a presentation by Dr. Rob Dunn, entitled “**The Wild Life of our Bodies.**” The event is free and includes a reception, but advance registration is requested. To register, please go to [ncbg.unc.edu](http://ncbg.unc.edu).

Dr. Dunn, a member of the biology faculty at NC State University and author of *The Wild Life of our Bodies*, will join us in the Reeves Auditorium at the NCBG to reveal the not particularly well known species that occur in our backyards, bedrooms, and in or on our friends, family, and ourselves.

The NCBG, part of the University of North Carolina, is a 1,000-acre assemblage of display gardens and natural areas. It is nationally known as a center for the study, display, interpretation and conservation of plants. Through its educational, recreational, therapeutic horticulture and research programs, it extends opportunities for connection with nature to people of all abilities and backgrounds. The Garden is open seven days a week and admission is free. Information at <http://ncbg.unc.edu>.
